 - For Mac: open a new terminal window
 - Navigate to the folder you just download
 - Run the following command: `mvn spring-boot:run`
- 6) Open project
 - Open browser and navigate to localhost:8080/

Using the Site

HomePage Options:

- 1) Home
- 2) Technologies
- 3) Plan
- 4) Team
- 5) Contact
- 6) Sign In

These options are located on the top menu bar of the main webpage. To access these options they can be clicked, which will scroll you to the correct section of the main page to access them.

Sign-In

To sign-in click the sign-in button on the top right of the webpage. You will not need to input user information, you just need a valid google account to be able to sign-in to Planopedia.

When you are ready to make a plan:

First sign-in if you would like to save your created plans for the future, then click the “Plan” button on the top menu bar. You will need to then input your city, zip code, type of cuisine, and number of guests attending in the presented input fields. Click “Submit” and you will be taken to a new page with your restaurant’s information.

To save a created plan:

Make sure you are signed in to Planopedia. After you are brought to the new plan’s page, look for the “Plan it!” button and click that. This will save that plan’s information on your user profile.

To access a saved plan and rate it:

You must be signed in, then you are able to click on your name in the top right-hand corner of the webpage to access your previously saved plans. Once you access them you are able to click on them and view them.

When viewing previous plans you will see a button that says “Rate it” with a drop down allowing you to rate the experience from 1 to 5. Choose your appropriate rating and then click the rate it button to save your score.
